

BOILER FEED WATER SYSTEMS | Triple M Horizontal & Vertical Series

The Triple M Series of feed water systems are designed and built for maximum **performance**, **value**, and **uptime**.

STANDARD FEATURES

MAXIMIZING PERFORMANCE:

- High efficiency pumps
- Steam injection
- Optimized operating levels
- Tank insulation (horizontal models)
- High water alarms

MAXIMIZING VALUE:

- Stainless steel tank
- Stainless steel chemical injection quill
- Stainless steel suction piping

MAXIMIZING UPTIME:

- Low water pump cutoff
- Make-up water bypass
- Auto/manual pump operation
- Duplex/triplex pumps
- Chemical feed pump power & control

CUSTOM OPTIONS

Custom sizes, controls, and pump configurations available upon special order.

For stocked configurations, we ship within 3 business days. *See back side for configuration details.*

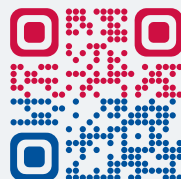

About Triple M Feedwater Systems

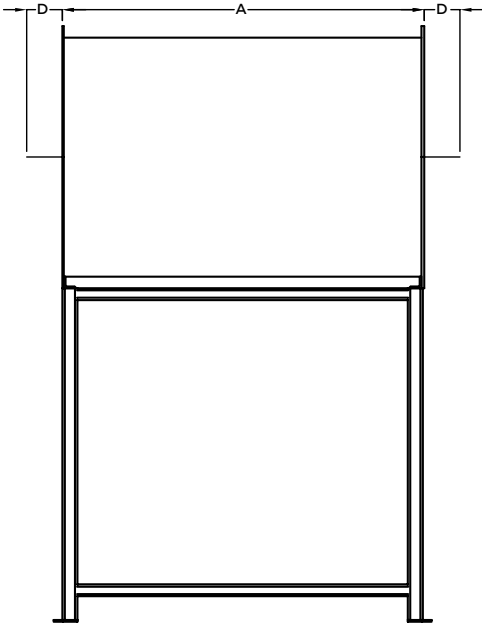

Manufactured in California's Central Valley, our Triple M feed water systems are fast to reach Western U.S. customers.

Max Boiler Technologies products, including the Triple M feed water system series, are manufactured in our state-of-the-art fabrication facility in Fresno, California.

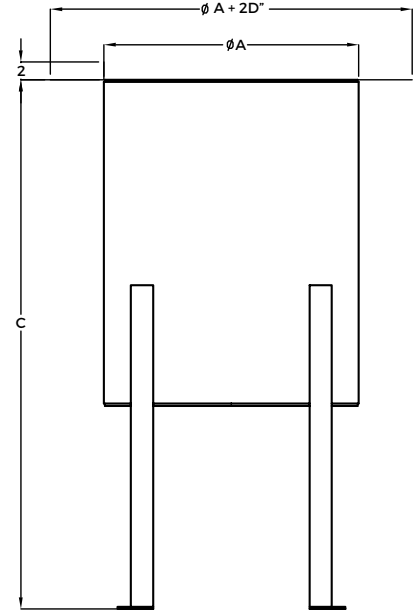

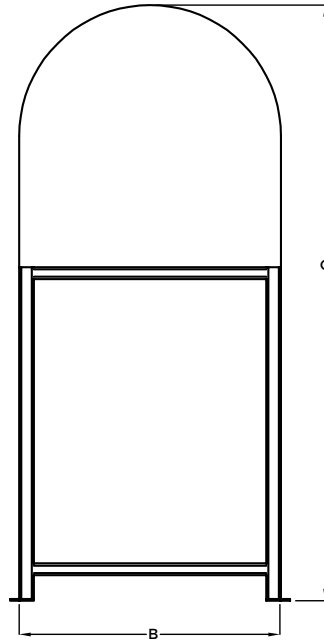

Contact us for pricing and availability, as well as **custom fabrication** needs, such as boiler tube bending, machining, and complete boiler system refurbishing.
